

Felix Billieres

Offensive Security Researcher

Paris, France | felix.billieres@ecole2600.com

GitHub: [felixbillieres](#) | LinkedIn: [felix-billieres](#) | HackTheBox: [ElliotBelt](#) | RootMe: [Elliot_Belt](#)

Professional Experience

Purple Teamer

September 2025 – Present

Confidential, Paris, France

- Purple Team operations combining offensive and defensive security
- Security assessment and penetration testing
- Threat hunting and incident response
- Security architecture review and hardening

Pentester

September 2024 – September 2025

Galleries Lafayette, Paris, France

- Vulnerability identification and remediation
- Web services and Active Directory hardening supervision
- Blue Team training on advanced AD attacks
- Security assessment and penetration testing

Analyste SOC N1 & N2

September 2023 – September 2024

ITrust, Toulouse & Paris, France

- SOC Analyst Level 1 & 2 with focus on Blue Team & Red Team skill development
- Log analysis and incident report writing
- Team participation in pentest seminars and CTF competitions
- Internal penetration testing and offensive security

Education

4th Year Cybersecurity Student

2022 – 2026

École 2600, Paris, France

Specializing in offensive security with strong foundations from CTF competitions with Phreaks 2600

Certifications & Achievements

2025

- **CRTO Training Modules** - Zero-Point Security (Dec 2025) - Cobalt Strike, Adversary Simulation, EDR Bypass
- **Mythical Mini Pro Lab** - HackTheBox (Dec 2025) - C2 Operations, MSSQL attacks
- **University CTF 2025: Tinsel Trouble** - HackTheBox (Dec 2025)
- **Rastalabs Prolab** - HackTheBox (Oct 2025) - AD Exploitation, Token Impersonation, Privilege Escalation
- **Certified Web Exploitation Specialist (CWES)** - HackTheBox (Sept 2025)
- **Zephyr Prolab** - HackTheBox (Aug 2025) - AD flaws, Relay attacks, Lateral movement

2024

- **University CTF 2024: Binary Badlands** - HackTheBox (Dec 2024)
- **Practical Network Penetration Tester (PNPT)** - TCM Security (Nov 2024)
- **Attacking and Defending Active Directory** - Altered Security (Jun 2024)

Platform Statistics

- **HackTheBox:** 70+ machines (Easy to Hard)
- **OffSec:** 60+ machines (Easy to Very Hard)
- **RootMe:** 4000+ points
- **PortSwigger Academy:** 60%+ completion

Open Source Projects & Tools

AuditMapper v2 - github.com/felixbillieres/AuditMapperV2

Security Assessment Suite presented at WineRump conference in Bordeaux. Comprehensive penetration testing toolkit featuring host management, AD mindmap renderer, config generators, Kanban & time tracking.

Exegol MCP - github.com/ThePorgs/Exegol-MCP

Model Context Protocol integration for Exegol. Custom pentest tools for reconnaissance, AD, and web security.

pySIDHistory - github.com/felixbillieres/pySIDHistory

Modular Python tool for remotely manipulating SID History attributes in Active Directory from Linux hosts.

pyGoldenGMSA - github.com/felixbillieres/pyGoldenGMSA

Python equivalent of GoldenGMSA for exploiting Group Managed Service Accounts in Active Directory.

Community Involvement

Phreaks 2600 - Board Member

Internal project management and event organization. CTF Challenge Creator (Web, Forensics, Pwn). Workshop Developer for advanced training labs and web vulnerability exploitation.

The Hacker Recipes - Active Contributor - thehacker.recipes

Contributing to documentation and techniques for Active Directory exploitation, web security, and penetration testing methodologies.

Bug Bounty Hunter

Active bug bounty hunting across various programs, identifying and reporting security vulnerabilities.

Technical Skills

Specializations: Active Directory Exploitation, Web Application Security, Bug Bounty Hunting, Red Team Operations

Tools: Cobalt Strike, BloodHound, Impacket, Burp Suite, Metasploit, NetExec | **Programming:** Python, PowerShell, Bash, JavaScript

Platforms: Linux, Windows, Active Directory, Cloud Security | **Languages:** French (Native), English (Fluent)
