

Felix Billieres

Offensive Security Researcher

Paris, France | felix.billieres@ecole2600.com

GitHub: [felixbillieres](#) | LinkedIn: [felix-billieres](#) | HackTheBox: ElliotBelt | RootMe: Elliot_Belt

Professional Experience

Offensive Security Researcher & AI Integration

September 2025 - Present

Exegol

Remote

- AI integration within the Exegol ecosystem: ongoing research and development of AI-powered offensive security tooling (work in progress, not all public)
- Offensive security tooling development and Active Directory offensive training programs
- Security audits and penetration testing (web, internal, Active Directory)
- Technical content creation: documentation, training material, and labs

Purple Teamer

September 2025 - Present

Confidential

Paris, France

- Purple Team operations combining offensive and defensive security
- Security assessment, penetration testing, threat hunting, and incident response

Pentester

September 2024 - September 2025

Galleries Lafayette

Paris, France

- Vulnerability identification, web services and Active Directory hardening supervision
- Blue Team training on advanced AD attacks, security assessment and penetration testing

SOC Analyst N1 & N2

September 2023 - September 2024

ITrust

Toulouse & Paris, France

- SOC Analyst Level 1 & 2 with Blue Team & Red Team skill development
- Log analysis, incident report writing, pentest seminars, and internal penetration testing

Education

5th Year Cybersecurity Student

2022 - 2027

École 2600, Paris, France: Specializing in offensive security with strong foundations from CTF competitions (Phreaks 2600)

Certifications & Achievements

2026

- **Heron, Intercept, Puppet, Tea, Trusted:** HackTheBox Mini Pro Labs (Jun-Jul)
- **Tengu Prolab:** HackTheBox (Jun)
- **COAE:** HackTheBox (May)

2025

- **CRTO Training Modules:** Zero-Point Security (Dec)
- **Mythical Mini Pro Lab:** HackTheBox (Dec)
- **University CTF 2025:** 35th/1014 with Phreaks2600 (Dec)
- **Rastalabs Prolab:** HackTheBox (Oct)
- **CWES:** HackTheBox (Sept)
- **Zephyr Prolab:** HackTheBox (Aug)

2024

- **University CTF 2024:** 4th/1128 with Phreaks2600 (Dec)
- **PNPT:** TCM Security (Nov)
- **Attacking & Defending AD:** Altered Security (Jun)

Platform Statistics

- **HackTheBox:** 70+ machines
- **OffSec:** 60+ machines
- **RootMe:** 4000+ points
- **PortSwigger:** 60%+ completion

Open Source Projects

pyKerberloss: [GitHub](#)

KerberLoss (CVE-2026-25177): Unicode SPN collisions in Active Directory, enabling service hijacking.

pyResetNightmare: [GitHub](#)

ResetNightmare (CVE-2026-27912): UPN spoofing on Kerberos change-password for account takeover.

Exegol MCP: [GitHub](#)

MCP integration for Exegol: custom pentest tools for reconnaissance, Active Directory, and web security.

pySIDHistory: [GitHub](#)

SID History manipulation in Active Directory from Linux.

pyGoldenGMSA: [GitHub](#)

gMSA exploitation in Active Directory environments.

Community Involvement

Speaker: FIC 2026

Talk on an MCP-orchestrated purple team: autonomous attack simulation, detection engineering, and rule validation at scale.

Speaker: HackTheBox Meetup 2026

Talk on agentic AI workflows that sharpen model reasoning over real-world targets: context grounding, retrieval-augmented enumeration, and iterative tool-driven feedback loops.

Speaker: WineRump 2025

Presented AuditMapper, a BloodHound-style mapper for internal audits: interactive note-taking and engagement automation.

Phreaks 2600: Board Member

Project management, CTF creator (Web, Forensics, Pwn), workshop developer for advanced training labs.

The Hacker Recipes: Contributor

[thehacker.recipes](#): Contributions on Active Directory exploitation, web security, and pentest documentation.

Bug Bounty Hunter

Active vulnerability research and responsible disclosure across multiple programs.

Technical Skills

R&D: Unfamiliar stack, undocumented protocol, a tool that does not exist yet. I can make it happen.

Specializations: Active Directory Exploitation, Web Application Security, Bug Bounty Hunting, Red Team Operations

Tools: Cobalt Strike, BloodHound, Impacket, Burp Suite, Metasploit, NetExec

Programming: Python, PowerShell, Bash, JavaScript, TypeScript

Platforms: Linux, Windows, Active Directory, Cloud Security (AWS, Azure)

Languages: French (Native), English (Fluent)
